This system allows the school management to know exact number of students entered the school campus either by bus or by own transport. The attendance is recorded with timestamp and gate info for analysis.

The Exit control Device helps the identification of authorised person with real-time updated information of students he/she can take with.

The Exit Device records exact time and update on cloud for parent and school information.

Campus Entry Attendance

- Ensure safety by recording student entrance time in school
- Gate attendant scan student ID card on entrance with device
- Update exact entrance date & time of students to school/parents

1 Scan student card
